

EGYPTIAN CIVILIZATION.

Its Origin One of the Unsolved Enigmas of the World.

The origin of Egyptian civilization has been the enigma of the world for the past twenty-five centuries. Presenting no historic or even mythic fancy, it appears before the world at once as a highly civilized and organic community centuries before Moses was a boy. Upon this subject Renan says "Egypt has no archaic epoch, but suddenly takes its place in the world in all its matchless magnificence, without father and without mother and as clear apart from all evolution as if it had dropped from the unknown heavens." Would not an explanation at least feasible be found in the hypothesis that it received its civilization from some source no longer existing? Menes, the first historic figure in its long line of dynasties, the outlines of whose personality loom up waveringly indefinite but grandly impressive against the deep mythic background of prehistoric story at least 4500 B. C., conceived and executed enterprises extorting the warmest admiration from the best engineers of the twentieth century. Did he not alter the course of the Nile by vast embankments to gain stable foundations other than in shifting sands for his sacred city of Memphis and construct the artificial lake of Moeris, 45 miles in circumference and 350 feet deep, as a reservoir for the waters of the Nile?

Look, too, at the colossal achievements of his successors in architecture, sculpture, engineering, astronomical, political, medical, social and military science, to say nothing of navigation and theology. Witness the ruins of the Labyrinth recorded by Herodotus, which had 3,000 chambers, half of them above ground and half below, a combination of courts, chambers, colonnades, statues and pyramids. Witness the wonders of the magnificent temple of Karnak, which still awakens our admiration, a temple, as Denon says, wherein the Cathedral of Notre Dame in Paris could be set inside one of its halls and yet not touch the walls. Witness the sublime pyramids originally built in honor of the sun god Ra and for use as astronomical observatories, the splendors of Memphis, Thebes and Heliopolis, of the sphinx and the obelisks, the statuary and the numerous temples with the ruins of which the land is still filled.—Exchange.

CATCHING TURTLES.

Methods Used by the Fishermen of the Tropics.

Turtles are always captured at night and usually on moonlight ones. This is the time they go on the shore to lay their eggs. They select a smooth, sandy beach, dig holes in the sand, deposit their eggs there and leave them to be hatched by the heat of the sand. When the turtles are on shore for this purpose hunters come upon them, and they are easily overtaken, for turtles are slow movers. The hunters have not a very strenuous undertaking. All that is necessary to be done is to turn the turtles on their backs and leave them until the next day, when they are removed.

Another more curious way of catching turtles is by fishing by the remora, a fish found in the tropical waters. The popular name of this fish and the one by which the children of those countries call them is the sucking fish. This name is given to them on account of a disk on their heads, by which they can attach themselves to any smooth surface, like the side of a shark, a ship or the shell of a turtle. This disk is like the soft leather "suckers" that are popular with schoolboys. When this fish has once attached himself to anything you can pull him to pieces rather than force him to release his hold.

Turtle hunters go in boats and carry several of these remoras in tubs. When they see a turtle and get near him the sucker is sent after him. He is held by the ring on his tail, which in turn is attached by a stout cord. Soon the fish is securely fastened to the shell of the turtle, and turtle and fish are hauled into the boat together. Once in the air the remora loosens his hold and is dropped back into the tub to rest until another turtle is sighted.—Washington Star.

Govern Yourself.

Men and women often say they can't govern themselves. That is simply admitting they have defects of character which are their masters. They ought to make effort and see if they are not mistaken. The worst effects of lack of self control are on the health. It allows every kind of bad habit in eating, drinking, dressing and sleeping to gain possession of the person, and the result is a weak instead of a strong character.—Home Notes.

Red In Battle.

Red has always been a favorite military color. Its employment dates from the time of Lycurgus, the Spartan, who commanded his army to be arrayed in red tunics in order that new recruits might not be dismayed at the sight of blood. Its first use in the British army dates from 1526, when the women of the guard were dressed in red.

Resemblances.

Fogg—I told Bass what you said—that he reminded you of a giraffe because he held his head so high. Fender—And what did he say? Fogg—He said you reminded him of an ass. Fender—Because why? Fogg—Because you are one, he said.

She Could Tell.

Wife—John, you've been drinking. Oh, I can tell. Husband—Well, don't do it, m'dear. Let's keep it a family secret.—Philadelphia Ledger.

THE MORNING ASTORIAN

QUICK RETURN COLUMNS

The supplying of any want that may arise in domestic or commercial life may be readily and quickly accomplished at a nominal cost by the publication of the want in the "Want Ad." columns of the Morning Astorian.

A necessity which may arise for buying or selling horses, carriages, furniture, pianos, real estate, sewing machines, bicycles, safes, watches, jewelry, typewriters, or thousands of other articles, can be met at once by the insertion of a suitable advertisement in the morning Astorian.

To secure help of any sort, or situation of any kind, to find lost articles, to secure board or boarders, lodging or lodgers, borrow money, obtain any kind of security; any of these wants may be supplied by using the "Want" columns of The Morning Astorian.
